**NextGen Support**

Data Tailored to Your Practice's Needs

# **B** Our team can leverage your EHR/EPM data to meet clinical, regulator and meaningful use needs

Incentives are available for Eligible Professionals who demonstrate meaningful use of a certified EHR

Providers who don't transition into EHR will have financial penalties applied to their reimbursement beginning in 2015. If your practice is considering or has adopted the NextGen EHR or EPM and you need assistance in meeting return on investment expectations and meaningful use requirements — or want to improve workflow and outcomes — **call BI Consulting today.**

**BI Consulting helps your practice achieve reporting goals through:**

- Full-cycle implementation support
- Project management
- Workflow support and analysis
- Application builds and template development
- Software release upgrades support
- Custom integration and rules development
- Customized reports

**“The combination of NextGen and BI Consulting will help us meet our meaningful use goals.”**

— **Joseph Aracri** DO, *President, Pediatric Alliance PC*

**Proven NextGen strategic management guidance to enhance reporting efficiencies, reduce risk and streamline operations**

BI Consulting offers a unique understanding of how NextGen products are successfully deployed across multiple practices and specialties, including: Pediatrics, Endocrinology, GI, Gynecology and women's health services, and FQHC (Federally Qualified Health Centers). We partner with numerous health care practices that benefit from our implementation experience and years of managing and supporting physician groups.

**What sets us apart is our ability to customize NextGen information technology to meet provider's needs**

BI Consulting is a subsidiary of physician-owned and operated Pediatric Alliance, a practice with nine divisions, 12 locations and 40+ providers. An early adopter of the NextGen EHR/EPM system, Pediatric Alliance continues to strengthen its operation through extensive investment in internal IT support services.

## **Meet the BI Consulting Team Leaders:**

### **James Troup**

M.S. in Management Information Technology

**Chief Executive, BI Consulting**  
**Chief Executive, Pediatric Alliance**

With more than a decade of senior management experience and university-level adjunct faculty work, James is a strategic executive. As head of BI Consulting, he confers with practices on adopting outcome measures as an integral part of patient care and on utilizing technology-driven services to increase profits, productivity and competitive edge. James is an active member of HIMSS, PAeHI, MGMA, ACHE, and the Project Management Institute.

### **Gary Janchenko**

B.S. in International Business  
Master's Certification in Project Management  
Pursuing Master's in MIT

### **Director of Technology**

Gary is a natural coach and top-performing business analyst, team leader and IT expert. He assists medical practices to embrace and execute in innovative technologies and helps them to drive constant improvement in the quality of patient care while realizing greater ROI from their NextGen EPM/EHR systems.
